## **CLAIM AMENDMENTS:**

The following is a complete listing of the claims and reflects all changes currently being made to the claims. This listing supersedes all earlier versions and all earlier listings of the claims:

1. (Currently Amended) A cosmetic composition comprising a first film forming siloxane polymer, and a second film forming polymer consisting of a silicone acrylic copolymer, obtained by polymerizing siloxane monomers and at least one ethylenically unsaturated monomer of the general formula:

Wherein R<sub>1</sub> and R<sub>2</sub> are each independently H, halogen, hydroxyl, fluoroalkyl, a C<sub>1</sub> straight or branched chain alkyl, aryl, aralkyl; R<sub>2</sub> is a pyrrolidone, or a substituted or unsubstituted aromatic, alicyclic, or bicyclic ring where the substitutents are C<sub>130</sub> straight or branched chain alkyl, or COOM or OCOM herein M is a C<sub>130</sub> straight or branched chain alkyl, pyrrolidone, or a substituted or unsubstituted aromatic, alicyclic, or bicyclic ring where the substitutents are C<sub>130</sub> straight or branched chain alkyl, and Wherein wherein said polymers are solvated or dispersed in a cosmetically acceptable nonpolar oil.

- 2. (Original) The composition of claim 1 wherein the first film forming siloxane polymer is a silicone resin.
- 3. (Previously presented) The composition of claim 2 wherein the silicone resin is a Tresin, an MT resin, and MQ resin or mixtures thereof.
- 4. (Withdrawn) The composition of claims 3 wherein the silicone resin is a T resin.

224656.1

- 5. (Withdrawn) The composition of claim 4 wherein the T resin comprises alkoxy and/or hydroxyl groups.
- 6. (Withdrawn) The composition of claim 2 wherein the silicone resin is an MT resin.
- 7. (Withdrawn) The composition of claim 6 wherein the MT resin is of the general formula  $M_xT_y$  wherein M is R<sub>1</sub> R<sub>2</sub>R<sub>3</sub>SiO<sub>1/2</sub>; T is RSiO<sub>3/2</sub>.
- 8. (Withdrawn) The composition of claim 7 wherein the MT resin additionally comprises one or more dysfunctional units.
- 9. (Original) The composition of claims 3 wherein the MQ resin is of the general formula  $M_xT_y$  wherein M is  $R_1$   $R_2R_3SiO_{1/2}$ ; Q is  $SiO_{4/2}$ ;  $R_1$ ,  $R_2$ , and  $R_3$  are each independently  $C_{1-30}$  straight or branched chain alkyl or phenyl; and x and y are each independently 1-1,000,000.
- 10. (Original) The composition of claim 9 wherein  $R_1$ ,  $R_2$ , and  $R_3$  are each independently methyl or phenyl.
- 11. (Original) The composition of claim 10 wherein the MQ resin has alkoxy or hydroxyl functional groups.
- 12. (Previously Presented) The composition of claim 1 wherein the second film forming polymer is obtained by polymerizing one or more M, D, T, or Q units with one or more ethylenically unsaturated monomers.
- 13. 14. Cancelled.
- 15. (Previously presented) The composition of claim 1 wherein the ethylenically unsaturated monomer is an acrylate or methacrylate.
- 16. (Original) The composition of claim 15 wherein the second film forming polymer is a silicone acrylate copolymer.

- 17. (Original) The composition of claim 1 wherein the nonpolar oil is a paraffinic hydrocarbon.
- 18. (Original) The composition of claim 17 wherein the paraffinic hydrocarbon is volatile.
- 19. (Original) The composition of claim 1 which is an anhydrous pigmented composition.

## 20. Cancel

- 21. (Previously Presented) The composition of claim 1 wherein the first film forming siloxane polymer is trimethylsiloxysilicate and the second film forming polymer is a copolymer of silicone and an ethylenically unsaturated monomer which is acrylic acid, methacrylic acid, or their simple esters.
- 22. (Previously Presented) The composition of claim 21 wherein the second film forming polymer is a copolymer of silicone and acrylic or methacrylic acid esters.
- 23. (Withdrawn) The composition of claim 1 wherein the first forming siloxane polymer is polymethysilsesquioxane.
- 24. (Withdrawn) The composition of claim 23 wherein the second film forming polymer is a copolymer of silicone and ethylenically unsaturated monomers which are acrylic acid, methacrylic acid, or their simple esters.
- 25. (Withdrawn) The composition of claim 24 wherein the second film forming polymer is a copolymer of silicone monomers and ethylenically unsaturated monomers that are esters of acrylic or methacrylic acid.
- 26. (Withdrawn) The composition of claim 23 wherein the second film forming polymer is a silicone acrylate copolymer.

224656.1

- 27. (Previously Presented) The composition of claim 21 wherein the second film forming polymer is a silicone acrylate copolymer and the nonpolar oil comprises isododecane.
- 28. (Previously Presented) The composition of claim 21 wherein the second film forming polymer is a silicone acrylate copolymer and the nonpolar oil comprises cyclomethicone or linear volatile dimethicone.
- 29. (Previously Presented) The composition of claim 21 wherein the second film forming polymer is a silicone acrylate copolymer and the nonpolar oil comprises a nonvolatile silicone.
- 30. (Previously Presented) The composition of claim 29 wherein nonvolatile silicone is dimethicone or a phenyl silicone.
- 31. (Previously Presented) The composition of claim 21 wherein in the nonpolar oil is an ester having a viscosity ranging from about 2 to 1,000,000 centipoise at 25° C.
- 32. (Previously Presented) The composition of claim 21 further comprising a chemical or physical sunscreen.
- 33. (Previously Presented) The composition of claim 21 further comprising a gellant.
- 34. (Currently Amended) The composition of claim 33 wherein the gallant gellant is a clay.
- 35. (Previously Presented) A color cosmetic composition comprising a first film forming polymer which is a silicone resin, and a second film forming polymer which is a silicone acrylate copolymer, and a nonpolar oil selected from a volatile paraffinic hydrogen, volatile silicone, or mixtures thereof, and pigments.
